

## What is Online Speech Therapy?

Online speech therapy or telepractice is the use of technology to provide speech therapy via high speed internet, webcam, headset with microphone or any other form of communication.

## Why Online Speech Therapy with ABC?

As of March 2020, credentialed Speech-Language Pathologists (SLPs) from ABC Pediatric Therapy Partners, Inc. have been providing live, online speech-language therapy to students throughout Georgia via secure, interactive video. Our licensed SLPs all have Master's degrees and experience in private practice and school settings.

Our online SLPs do the same job as on-site therapists: they administer assessments and write evaluations, prepare plans of care, serve as case managers, track and report on student progress, schedule students, and communicate with parents and staff. The length, content, and frequency of online therapy sessions are individualized in accordance with each student's plan of care, and are delivered one-on-one, in small groups, and in full classroom settings.

Online speech therapy can enable you to:

**Improve outcomes:** Online therapy has been shown to be effective

**Expand clinical capacity:** Access to a variety of credentialed clinicians

**Improve staff schedules and efficiency:** Schedule times that work for everyone

## Which assessments can we conduct online?

### Articulation/Phonology

Goldman-Fristoe Test of Articulation – Third Edition (GFTA-3)

Khan-Lewis Phonological Analysis – Third Edition (KLPA-3)

Arizona Articulation Proficiency Scale-3 (Arizona-3)

### Full Language Battery
